

Your business is timber. Not paperwork.

The EU sets the requirements. TimberTrail helps your team handle the paperwork.

01 / CHOOSE YOUR PLAN

Monthly prices exclude VAT

Small

€59

/ month

2 users | 1 company

All core workflows
API access included

For a small team.

Standard

€149

/ month

5 users | 1 company

All core workflows
API access included

For shared daily work.

Pro

€299

/ month

10 users | 1 company

All core workflows
API access included

More users. ChatGPT next.

Submissions included in every plan. No filing allowances or per-submission charges. Production filing is subject to activation; see page 2.

THE SAME CORE TOOLS, IN EVERY PLAN

Keep your records together

Suppliers, products, forest plots, ZGS decisions and incoming purchase evidence.

Work with your team

User roles, your company mandate, shared records and activity history.

Prepare and review statements

DDS and simplified-declaration workflows, GeoJSON checks and reusable templates.

Reuse your existing data

Supported CSV/Excel import into DDS drafts and API access for your systems.

PRO EXCLUSIVE / COMING SOON

Your documents. Your instructions. ChatGPT.

The planned ChatGPT connection through MCP will help extract information from your documents, organise records and prepare statements. It will ask for missing information and let you review and approve before submission.

Included in Pro when released. Not available in the current demo.

Choose the help you need.

Start independently, ask us to set up your workspace, or connect your existing systems.

02 / GETTING STARTED

Set it up yourself

€0

No onboarding charge

We open your organisation. You configure it with the documentation and standard support. Migration and live training are not included.

Let us set it up

€750

Once, excluding VAT

One company: agreed configuration, user setup, one supported CSV/Excel draft import and one team training session.

Connect your ERP

Individual quote

API access is included in every plan. Your developers can build the connection, or we can do it for you. We review the system and data flows, agree the scope and provide a project quote before work starts.

SMALL FOREST OWNERS

We help you prepare and file.

€50

one-off, incl. VAT

For an eligible owner selling timber from their own forest. We check the supplied information, prepare one straightforward simplified declaration and submit it under written authorisation. You receive the declaration identifier and a copy of the submitted information.

No subscription. Complex cases or later assistance are quoted beforehand.

Activation and scope. Production filing starts only after production access, your written authorisation and the end-to-end workflow are confirmed. The current demo uses the EU test environment. Required filing and evidence-export fixes must be completed before paid operational use. TimberTrail supports your documentation process; your company remains responsible for its data and due diligence.

Business subscriptions and setup exclude VAT. The €50 forest-owner service includes applicable VAT. Additional entities, extensive migration and custom integration maintenance are quoted separately. The final service scope is agreed in writing.

Less paperwork. More time for timber.
